

AUTONOMOUS COMPLIANCE

ComplianceHub

AI-powered autonomous compliance auditing for California real estate transactions.

OVERVIEW

ComplianceHub is an AI-powered autonomous compliance auditor purpose-built for California real estate. It reviews every page of your transaction file, validates every clause against the 2026 C.A.R. rule set, and identifies risks, exposures, and missing disclosures — all in under two minutes.

When it finds a problem, it does not just flag it — it routes the corrective action to the right person on your team automatically. No more chasing signatures, missing addenda, or discovering compliance gaps at the eleventh hour. Built for brokerages, transaction coordinators, and compliance officers who refuse to let a preventable error become a liability.

KEY CAPABILITIES

What sets it apart.

Full Document Scanning

Reviews every page of the transaction file — purchase agreements, disclosures, addenda, amendments, and counter-offers — with no manual checklist required.

2026 C.A.R. Rule Set

Validates every clause against the current California Association of Realtors standards, including the latest form revisions, mandatory disclosures, and regulatory updates.

Risk & Exposure Mapping

Identifies compliance gaps, missing signatures, incomplete disclosures, contradictory terms, and liability exposure — then quantifies the risk level of each finding.

Automated Action Routing

Routes each corrective action to the right team member — listing agent, buyer agent, escrow officer, or transaction coordinator — with deadline tracking and escalation.

HOW IT WORKS

Three steps.

01

Upload your transaction file

Drop the full transaction package — purchase agreement, disclosures, addenda, amendments — into the engine.

02

AI audits every clause

Every page scanned against the 2026 C.A.R. rule set. Risks, exposures, and missing items identified automatically.

03

Corrective actions routed to your team

Each finding is assigned to the right person with a deadline. No chasing, no guessing, no dropped balls.
